

Our Curriculum

Young children learn best by doing and play provides the foundation for academic learning. 3 to 5 Preschool uses *The Creative Curriculum* in our program to help children learn about the world around them. By using their natural desires for exploration and discovery, *The Creative Curriculum* enables children to develop confidence, creativity, and lifelong critical thinking skills. It is through intentional teaching we are able to provide playful and engaging activities that help turn every minute of the day into learning opportunities, intentionally promoting language, literacy, math, science, social studies, and physical skills. The most important goal of our curriculum is to help children become enthusiastic learners, not just in preschool, but all through their lives.

****View our daily activities on our Facebook Page****

The mission of 3 to 5 Preschool is to create an exciting and supportive learning environment where all members of the school feel they are accepted, nurtured, valued, and loved.

Our Philosophy

Young children learn best when provided with a safe, structured, and exciting learning environment. Our teachers believe students excel with an equal approach to both emphasis on play as well as an enhanced curriculum. Both our indoor and outdoor environments provide many opportunities for exploring and engaging in a world of activities. Through child directed and teacher facilitated play and a structured class schedule, the child acquires self-confidence, independence, excitement in learning, social skills, joy in friendship, self-discipline, curiosity and physical coordination.

Our Program
